#### Features:

- no maintenance
- uses compressed air
- easy to operate
- very affordable pricing

## **The Lemmer rust proofing spray system**

is perfect for small to medium sized shops who want professional results and low cost. The system is economical to purchase, and very easy to use and maintain. The A-460 internal mix gun atomizes the material by mixing air with the product in the gun's spray head. It pressurizes its own container and is self contained, just add air. The wand included with the system has an angled metal venturi nozzle with a heavy duty flexible rubber hose. It produces a conical spray pattern for general applications.
