June 27,2003

To who it may concern:

My name is Larry Skrumeda I am an Instructor at Red River College here in Winnipeg, Mb. In the Certificate-Collision Repair and Refinishing Program the students that I encounter have little to no practical experience when it comes to basic bodywork or painting.

Recently I had the opportunity to try out one of Lemmer's new gravity spray guns. The model A-928 to be exact, not only did I spray with this gun but several of my students did as well.

These are some of the comments I thought I would like to share with you in regards to this particular spray gun. *"I found the gun to be very user friendly"*.  
*"This spray gun is very comfortable to use, easy to set up"* the other comments were as follows, *"Overall appearance of finished product was very acceptable"*(Very good gloss and DOI).

*"Over spray is minimal"*. *"It is amazing to see how much paint it saved"*  
Paint flow out was very good as well; texture dependant upon user was minimal.

I received many positive comments from students in regards to this spray gun, as a matter of fact two students have purchased them. I would like to take this opportunity to thank Darcy and his staff for their commitment, and allowing my students and me the chance to try out and to demonstrate the different types of equipment that Lemmer has to offer the Automotive Industry.

It is indeed a pleasure having individuals like Darcy willing to give time and putting in the effort to help better educate future Repair/Refinish technicians. If you wish to contact me please do not hesitate to do so at 1-(204)-632-2069. I would also like to thank Lemmer Paint Systems for the donation of one A-928 we are currently looking at purchasing a spray gun for our program.

Thank you,

Respectably

Larry P. Skrumeda
