

# **TANKSTORE LTD.**

We are a tank and vessel manufacturer and own a self contained SUPER L-1000, Model # L013008 Electrostatic sprayer. It is a superior method of painting pipe and square tubing. Pipe that is 3" in diameter or smaller can easily be covered with a single pass. The paint completely wraps around the pipe with even coverage, and virtually no runs. We find that the ease of painting with the Electrostatic is time and cost effective.
