

LEMMER

The WIWA Professional GX is a masterpiece of German engineering. The GX generation of motors embodies a full metal housing, optimized air distribution to minimize freezing during permanent operation and reduced noise emission.

Fields of Application

- Large areas
- Marine coatings
- Steel and hall construction
- Wagon factories, paint and spray paint businesses
- Offshore industry
- Industrial coatings
- Structural engineering and corrosion protection
- Insulations
- Fire protection
- Transfer pump

Spraying Material

- Abrasive materials
- Flame protection
- Sprayable lacquers and paints
- Insulation and thick-film material
- Anti-fouling materials
- Low-solvent and solvent-free paints
- Sprayable lacquers and paints
- Plural component and tar-epoxy paints

Specification:

#L219-001 230035

- Free flow: 42 litre minute
- Ratio: 35:1
- Max fluid pressure: 4061 psi
- Max Air Inlet pressure: 116 psi
- Max tip 0,075
