

## GM5000EA Power Pack & Gun Kit

The Electrostatic 5000EA AirSpray **SKU: L013004** package brings the latest in electrostatic gun technology and design comfort to the industrial and commercial finishing rooms where quality counts! The GM 5000 EA Airspray gun fits comfortably in the operator's hand and its lightweight adds to ease of paint application (24.6 ounces).

**The GM5000EA gun is used with a remote pressure pot or a transfert pump.**

With the cascade design concept, voltage is generated at the gun, thus eliminating bulky high voltage cables. Its high efficiency charging system is variable up to 70 kV. The non-turbine cascade design eliminates the possibility of vibration. It features a Trigger-Mounted electrostatic on/off switch for operator convenience.

The Heavy Duty VM 5000 power pack electronically controls the high voltage of the GM 5000EA gun. The high voltage setting is adjustable from 0 to 70 kV and is displayed on a light bar which can be checked from a distance or on the gun display. A second light bar displays amperage output, and a red LED light indicates when gun cleaning or service is required. The variable high voltage allows the gun output to be adjusted to match the coating material being used and the object to be coated.

### **GM 5000EA Gun Specifications:**

Weight: 630 g, 1.39 lb  
Output voltage: 70 kV  
Output current: 100uA DC  
Air inlet: 1/4 NPSM (36-58 psi) 116 psi max  
Air requirements: 4-10 CFM  
Fluid inlet: 3/8 NPSM (7-29 psi) 116 psi max  
Fluid hose and Power cable : 25'  
Power supply: VM 5000

### **VM 5000 Power Pack Specifications:**

Nominal input voltage: 115 VAC  
Input current: 0.5 amp  
Output Voltage: 20 Vpp AC  
Output Current: 1.0 Amp
