

A-728P HVLP Pressure Feed

SKU: L081051

The A728S is the newest gun in the Lemmer HVLP line and features a **non-bleeder design**, simplified adjustment and a 1 quart container. Advantages of a non-bleeder gun are that they run **cooler and quieter**, may have less build up on the air cap and stir up less dust in the work area.

The pressure feed gun is used with a remote pressure pot or a transfert pump.

This gun features a lightweight, precision cast aluminum body, a high flow air valve and convenient rear mounted spray fan control.

Materials which can be sprayed include varnish, urethane, lacquer, automotive paint, epoxy, enamel, stain, latex, oil base, multi color etc.

Note: If upgrading a T-55 or T-75 system to the A-728 gun, kit L080-649 is required to vent excessive pressure when the trigger is closed, and to reduce heat stress on the turbine motor. The T-90, T-95 and T-97 are already designed to accept a non-bleeder gun.

Applications:

- lacquer
- urethane
- stain
- epoxy
- automotive paints
- thinned latex
- thinned oil base

Features:

- Fully adjustable spray pattern.
- Chrome plated alloy body.
- Hollow body for true HVLP performance.
- Turbine version gun will hook up to most turbines on the market.

Specifications:

For Lemmer turbine T-90Q
 Fluid inlet: 3/8 NPS-M
 Air inlet: Quick Connect
 Atomization: external

Nozzle Sizes

available:
 1.0mm
 1.3mm
 1.5mm
 1.8mm
 2.0mm
 2.8mm
