Pressure Pot 2-1/4 Gallon Teflon

This heavy duty commercial paint pressure pot is inexpensive and easy to use. It provides a steady material flow for air guns. It resists tipping and is easy to clean with its inner teflon coated pot. (the included liner must be used with acid cure lacquer to prevent teflon coating from breaking up and mixing with lacquer).

It comes with 2 regulators: one for setting fluid pressure to a maximum of 50 psi, and the other for setting the air to the gun to a maximum of 100 psi. For use with all standard coatings such as: lacquer, enamel, stain, latex, epoxy, glue, etc. A one gallon paint can will fit inside the pot. The suction tube is in Stainless Steel.

Pressure Pot Specifications:

Maximum pressure: 50 psi

Air inlet: 1/4" NPS-M

Air outlet: 1/4" NPS-M

Fluid outlet: 3/8" NPS-M

Shipping weight (std.): 20.3 lbs

Shipping size " (std.): 12L 12W 14H
