

T-55Q HVLP Turbine with Suction Gun

This professional HVLP paint sprayer **SKU: L080039** system is excellent for both the handyman and the professional. Its quiet 2 stage turbine (74 db) provides dry warm air to the all metal A-712S bleeder type guns and comes with an insulated handle.

This competitively priced system uses very advanced noise suppression materials. The T-55Q HVLP turbine sprays all conventional coatings including lacquer, enamel, latex, stain and other light materials.

This system is a complete kit which includes: T-55Q turbine, A712 gun with general purpose 1.4mm needle, 25 ft air hose, air flow control valve, service kit and viscosity cup.

Specifications:
