Order #L033-300**

1/4" nps air and fluid connections

The Lemmer rust proofing fogging gun

is perfect for all shops that want professional results. The F-1001 is a high quality 3300 psi gun with an integral air shut off valve and fluid filter. The design is compact and strong. The gun body is a one piece aluminum forging for light weight, and the fluid valve is made of long lasting tungsten carbide. Fog is created by mixing air with product in the gun's mixing chamber. Another feature is the mixing chamber can be easily removed so the F-1001 can be used as a conventional airless spray gun. No special spray nozzles are required as the F-1001 uses standard airless flat tips. It is shipped with a .015"-08", many other sizes are available upon request.
