## Pipe Coater Complete Kit

The Professional Inside **SKU: L033573** Pipe Coater is perfect for 10" to 27" pipes not accessible for manual spraying. Just attach a spray tip of your choice and the air powered rotary motor will turn the spray head 360° at a variable rotational speed between 10 and 100 RPM for a smooth and even coat.

Use your airless hose with a shut off valve or gun to control the flow. The unit is pulled through the pipe manually. An automatic gun can be added onto the rotator to ensure a crisp shut off.

### **Pipe Coater (auto rotating for internal 10" to 27" pipe):**

Max. fluid pressure: 3600 psi

Air pressure range: 30 - 100 psi

Air CFM req'd: 2 - 6 CFM

For pipe sizes: 10" to 27"

Fluid inlet thread: 1/4" npt

Tip attachment thread: 11/16"-16

Air inlet: 1/4" NPT-F
