- affordable pricing

The Lemmer rust proofing spray system

is perfect for small to medium sized shops who want professional results. The system is economical to purchase, and very easy to use and maintain. The RP-460 HD gun atomizes the material by mixing air with the product in the gun's spray head. The wand included with the system has an angled metal venturi nozzle with a heavy duty flexible rubber hose. It produces a conical spray pattern for general applications.
